

Amendment to the Specification

Please replace the paragraph that begins on page 9, line 12 with the following new paragraph.

Terminals A to D, virtual server SS and voice server SA are formed of a computer device consisting of a CPU (central processing unit) and its peripheral circuits. This computer device functions as shown by each of the blocks of FIG. 1 under the control of specific programs recorded in a recording medium (i.e., magnetic disk, semiconductor memory, etc.). ~~Note that the aforementioned control program can be distributed via the communications circuits.~~
